

DIRECTIONS:

Step 1 - print out killculator--the stiffer the paper, the better. Step 2 - cut out killculator from white paper (be sure to keep these directions). Step 3 - fold each crease along the black lines. Step 4 - use double-sided tape or glue to attach tabs B1, B2, C1, C2 and D to the backs of the unmarked tabs. Be sure that killculator's arms are on the outside when you're done glueing or taping together. Step 5 - enjoy your new killculator!
